

MEMO FROM  
J. LEDERBERG  
GENETICS DEPARTMENT  
STANFORD UNIVERSITY  
STANFORD, CALIFORNIA

TO: Hon. Charles S. Gubser  
U.S. Congress

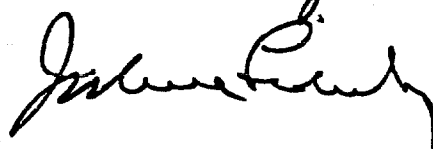

TX  
RC  
RO

Dear Mr. Gubser:

I have been distressed to note that you have been so impressed by Dr. Shockley's allegations that the National Academy of Sciences has sought to suppress research on human genetic differences. I believe it would contribute to the objectivity of the record if you could add the full, actual text of the Academy committee's recommendations.

It would be a pleasure to be able to discuss this with you in person sometime at your convenience when you are visiting your home office here, and I will respond with vigor if you can let me know when this might be possible.

I also enclose for your attention and interest a brief analysis of my own on the issues of racial-genetic differences as presented in a scholarly way by Professor Arthur Jensen.

Sincerely,  

bcc: McCluskey
